BillMax Billing Solutions

BillMax version 2.1 released

BillMax releases the most significant improvements and enhancements to date.

Fort Worth, TX, Wednesday, March 3rd, 2004 BillMax, a leading provider of billing software, today announced the immediate availability of BillMax version 2.1 for Redhat Linux, FreeBSD, and Solaris. This new release is the most advanced and powerful billing system available, with completely new documentation. Recent benchmarks on an Intel based 500 MHTZ, 50 GB hard drive, 256MB memory running FreeBSD successfully processed over 500,000 accounts, 600,000 services, and 22,000,000 financial transactions over a one year time period.

In addition to the new documentation and benchmarks, version 2.1 implements the most new features and improvements in BillMax history. Some of these include:

- Greater control of sending and presentation of statements.
- New and improved reporting tools.
- New usage based billing options.
- New recurring billing in any duration of day, week, month, or year.
- New cookie based login/logout feature.

The "demo" version of BillMax 2.1 is now available for download. A complete feature list is available by contacting BillMax's sales department at sales@billmax.com or 877-245-5629.

BillMax Billing Solutions is a wholly owned subsidiary of The iSpark Group, Inc. The iSpark Group was founded in 1994 as Fastlane Communications (ISP). BillMax billing software was introduced for sale in 1997. Today BillMax is recognized internationally as a leader in billing software and services. More information about BillMax can be found at <http://www.billmax.com>
